RE: New water application /the current one is # 79494 changed from 70706

Dear Mark Sivazlian,

We have made a new application for water to replace #79494. We needed this water. We would have liked to move water that we were not going to use, to make it simple and keep our priority date. But it seems that we could not move supplemental water to a new location. After we first applied for 70706 we purchased some additional land that is more productive and would have liked to put that water to beneficial use. We still need the water to put our land into production. All we want to do is use water in the new location and not use it where first applied for. We will drop those applications and permits if we can permit the new application. There will be no additional water out of our basin as we desire to use it only once.

If there are any questions please call.
